

Green Therapy: How Nature Affects Mood and Stress Levels

Hello and welcome to the experiment! Thank you for deciding to participate and help me out with this project it's greatly appreciated and helps out with the data a lot. This will be a 3-part experiment, the first part will just be answering questions based on how you feel in the current moment. For the second part, take as much time as you're willing to set aside, and go outside. You can take a seat and just try enjoying your surroundings, take a walk, or anything else you can think of! Just preferably try not to be on your phone or any other tech for this part. For the last part, you'll be answering the same questions as you did before along with a couple extra. Just answer true to yourself even if your responses remain the same, that's okay if you don't feel anything different everyone's different!

* Indicates required question

1. Rate your current level of stress. *

Mark only one oval.

1	2	3	4	5		
Very	☐	☐	☐	☐	☐	Very High

2. How energized do you feel? *

Mark only one oval.

Green Therapy: How Nature Affects Mood and Stress Levels

After answering the above questions, please take some time to step outside and then come back to the next questions. The amount of time is up to you, however, if possible, please try and stay out a minimum of 15 minutes.

Green Therapy: How Nature Affects Mood and Stress Levels

This third part is the same as the first part with a couple additional questions at the end. Thank you for taking my survey! If you have any further questions or comments, feel free to post them in the comment section of my post!
